

Discover the Best Roller Cover Solution

TPU Outperforms PVC

- **Long Lasting:** Increases component life span without reducing load ratings. TPU (thermoplastic polyurethane) does not crack or harden with age and will outlast PVC Roller Covers. Spiratite™ TPU roller covers wear better than Shrink Wrap or PVC.
- **Environmentally Friendly:** Unlike PVC, Spiratite™ TPU roller covers can be recycled, contain no toxic phthalates (plus, they don't smell!)
- **Cut, Tear & Abrasion Resistant:** TPU is more cut & abrasive resistant than PVC
- **Elasticity:** TPU retains elasticity better than PVC
- **Temperature Resistant:** TPU does not harden like PVC in cold temperatures

Spiratite™ TPU roller covers are engineered for high performance and long service life

Advantages of Spiratite™ Roller Covers

- **Excellent Wear Properties:** Made from 85A durometer thermoplastic polyurethane (TPU) (60A-90A durometers also available)
- **Product Protection:** Spiratite™ Roller Covers protect fragile items from metal roller damage
- **Better Incline:** Spiratite™ Roller Covers increase traction between roller & the product; promoting better incline conveyance of power roller conveyors
- **Noise Reduced:** Spiratite™ Roller Covers reduce noise to aid your hearing conservation efforts
- **Better Value:** Spiratite™ Roller Covers are offered at a fraction of the cost to PVC Roller Covers
- **Easy & Quick Installation:** No expensive equipment required
- **No Special Storage Requirements:** Unlike PVC Roller Covers, Spiratite™ Roller Covers can be stored at any temperature
- **Readily Available:** Stocked in 120" lengths for immediate delivery
